

I have a suffering, terminally ill Connecticut friend who will have to leave her home soon under horrible circumstances in order to end her horrific pain in another state, with her family's and doctor's blessing.

Please do not allow the Medical Aid In Dying bill to die in committee yet again, when 75% of Connecticut voters support MAID, according to a 2021 GQR poll.

Please let this bill come to the General Assembly so ALL members can vote. Only then will the people of Connecticut, through their elected representatives, finally be heard.

Thank you.
